

Keeler single-use cryo probe

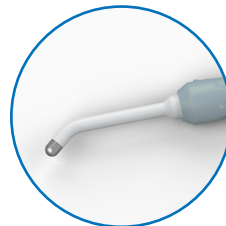

Reliability guaranteed with the Keeler cryomatic range

The Keeler single-use probe ensures comfort, safety and reliability for both you and your patients. As the only single-use probe guaranteed to be compatible with the Keeler cryomatic range, you can be assured of reliability straight out of the box. The new design incorporates an ergonomic handle to fit comfortably in your hand and allow better control of the probe, whilst the orientation pip enables perfect placement for increased efficiency. The Keeler single-use probes offer the same quality, performance and precision as our renowned reusable retinal probes, whilst offering the peace of mind that a sterilized probe is on hand for every patient.

Orientation pip

Tactile feedback to ensure perfect placement of the tip.

Curved tip

Designed with the optimum angle to ensure accurate contact with the sclera.

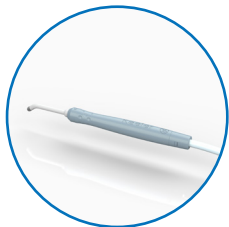

Ergonomic design

The single-use probe is shaped to allow better control of the probe, with an insulated body for comfort during the freeze stage.

Increased safety

Constructed with a fail safe auto defrost feature for 100% confidence.

The only solution for Keeler cryomatic

The only single-use probe designed specifically to be compatible with the Keeler cryomatic range, ensuring the best efficiency, reliability and patient safety.

PART NUMBER: 2509-P-8033 // COMES IN A BOX OF 10
